12. University of Petroleum Geophysical Society
13. University of Tongji Geophysical Society
14. University of Tsinghua Geophysical Society
15. National University of Chung Cheng Geophysical Society

How do your memberships in your country value SEG services?

Geophysicists in China have positive attitudes to SEG. They think SEG is a geophysical science group with the most authority. There are always friendship relations between SEG Chairmen, SEG Executive committee and Chinese geophysical industry. SEG has made significant affection to the development of Chinese geophysical industry. Such, Chinese geophysicists would like to join SEG. And all Chinese SEG Members having joined SEG quite value the hard-won chances.

How can SEG GAC better support you to carry out your responsibilities as country representative?

Would like to request SEG to offer a special reporting hall where the speakers can make their presentations in Chinese at the site during SEG annual meeting every year.
